

D365 ISV Product On- Prem to Online Upgrade Assessment

Designed to help existing Dynamics CRM On-Prem users upgrade their Dynamics CRM product to cloud

Brillio's D365 On-Prem to Online Upgrade tool enables quick upgrade with less cost in a well-organized phased manner leveraging proven frameworks. This tool will help reduce the data migration cost where customers have to purchase a third-party data migration tool.

WHAT IT CAN DO

- ❑ Provide tailored framework for data migration
- ❑ Automated tools/ scripts that reduce the time and manual interventions
- ❑ Data Migration tool to migrate data from on-prem to online; also helps to migrate audit data and personal component
- ❑ Performance assessment report to analyze the health of the Dynamics CRM organization on aspects of Configuration, Security, and Customization
- ❑ Reduce upgrade cycle time
- ❑ Provide with current implementation vs latest features mapping report at the end of the implementation to help customers get the maximum benefit of the platform
